

An Introduction to Understanding, Recognising and Healing Early Life Imprints

Facilitated by Ray Castellino

14th -17th September 2010

Florence House, Seaford, UK,

This 3 day seminar offers a rare opportunity to work with Dr Ray Castellino DC (Retired), a leading pioneer in the development of Infant Centred Family Therapy from USA.

This work is of prime importance, given that our entire life is informed by our experiences from conception onwards: in particular, these experiences affect our ability to form lasting, loving and intimate relationships. Ray's work is unique in supporting the Prenate as well as enhancing the support available to babies, children and adults to resolve their early life challenges. He has established fundamental healing principles that support bonding and attachment and family connections.

The seminar will include theory, video material and practical exercises that will enhance your skills for working within the prenatal and birth community. His teaching offers us a deepening of our understanding and an enhancement of our skills around the energetic dynamics within family relations hips. You will also begin to develop an understanding of your own prenatal and birth imprinting.

About Dr. Castellino DC (retired), RPP, RCST®, Raymond Castellino, draws on four decades of experience as a natural health care practitioner, consultant and teacher. His current practice focuses on the resolution of prenatal, birth and other early trauma / stress through an approach drawing on birth simulation and pre and perinatal somatic psychology, trauma resolution play therapy, polarity therapy, and craniosacral therapy.

Dr Castellino is co-founder and Clinical Director of BEBA, a non-profit research clinic in Santa Barbara devoted to strengthening the bonds between babies/ children

and their parents and optimizing children's physical, emotional and mental development.

He is the Director of the Castellino Prenatal and Birth Foundation Training, a two year training program for professionals developing therapeutic skills within the Prenatal and Birth field.

Dr. Castellino is on the adjunct faculty of Santa Barbara Graduate Institute, which offers Masters and Doctorates in both Pre and Perinatal Psychology and Somatic Psychology.

He has been practicing and teaching prenatal and birth therapy since 1993.

The seminar will take place at Florence House at Seaford, Sussex. Information about Florence House is available at

<http://www.florencehouse.co.uk/>.

It will commence Tuesday evening and complete Friday early afternoon and it is important that participants are there for the whole period.

\cont.

Accommodation

The course is residential and the pricing below includes full board and lodging for the three nights. If the seminar is full, the number of participants will exceed the available accommodation space at Florence House. If this occurs the course fee will include tuition and the

day rate charge for the three days. You will be advised of this price at the time of booking if there is no space at Florence House. There are local B&B places available as well as the opportunity to camp or have a motor home on the site.
